## BSE Personal Ionizer Kit - Includes Necklace and Vent Mount For Vehicle

### The Power of Ionization – On The Go

Bring ionization with you wherever you go – to the grocery store, on an airplane, to work, on public transit and more!

### Vehicle Compatibility

Each kit includes a vehicle vent clip, making it a seamless transition from necklace to vent mount, creating a flood of ions inside the vehicle.

### Benefits of Personal Ionizers

- Creates a personal ion bubble within 3 feet of the ionizer
- Wear around your neck, place on a table top, or use with the vent in your vehicle
- Protect yourself from airborne viruses, bacteria, odors, mold and more!

**Price: \$60 (Car Vent Kit Included)**  
**Kit includes: necklace, USB charging cord, & car vent attachment**

### What is Ionization?

The Needlepoint Ionization technology works to safely clean the air in your breathing zone, using negatively charged ions. The technology uses an electronic charge to create a plasma field filled with a high concentration of negative ions that replicate those commonly found in nature. As these ions are produced, they attach to particles, pathogens and gases including viruses, bacteria and mold. As the ions attach to airborne particles (including fine, sub-micron particles) they cluster together, making them fall out of your breathing zone via agglomeration. Ions also deactivate pathogens by robbing them of life-sustaining hydrogen.

**Car Vent Kit Included:** This allows for “on the go” ionization, creating a flood of ions by utilizing the forced air of the heating & cooling to spread ions out throughout the vehicle.

*\*Do not use if you use a pacemaker*

*\*Standard color is black – order colors require min. qty order.*

*\*Recommended use for necklace is to wear over clothing*

*\*Personal Ionizer - Made in China*
